

# Fibonacci Konuları

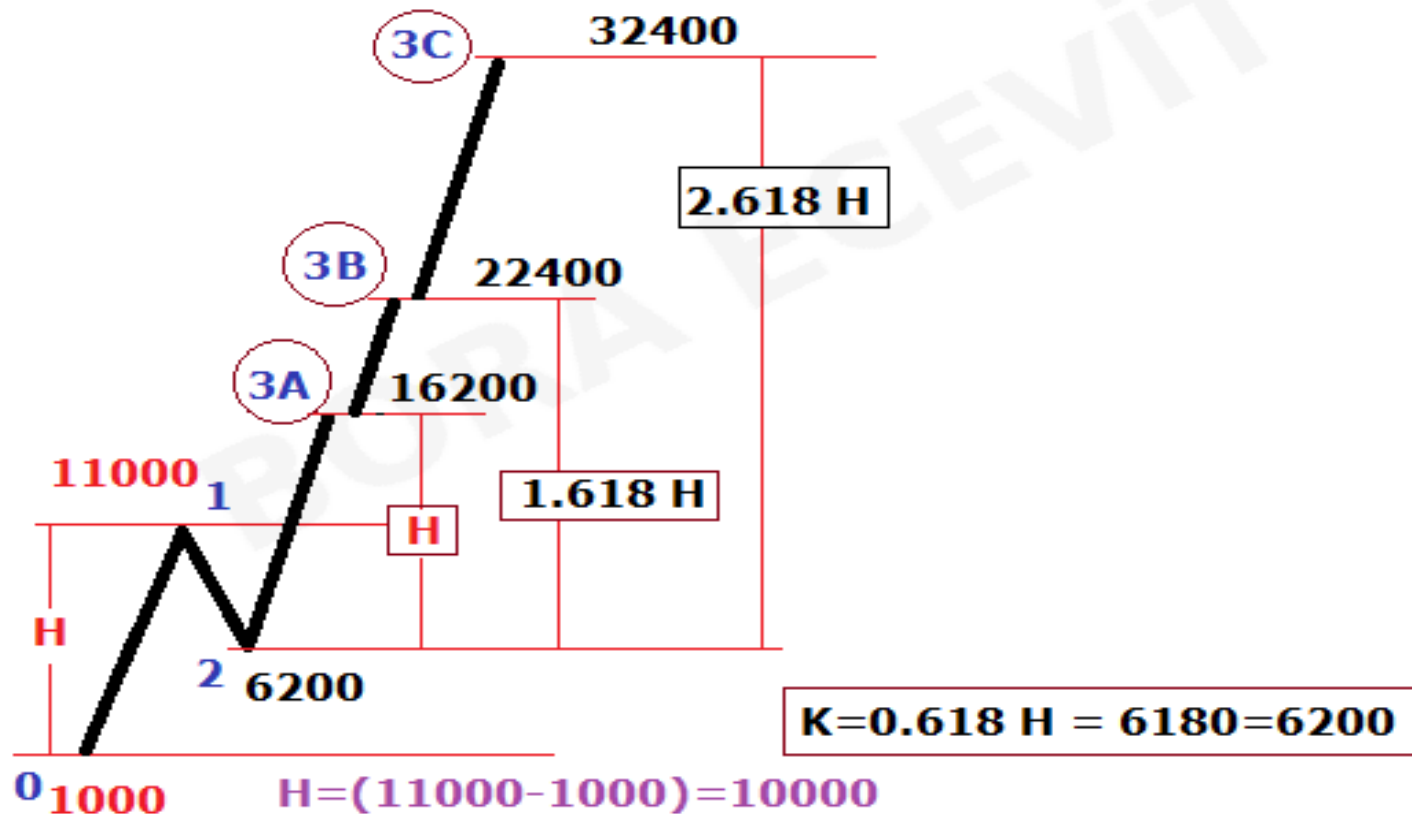

**İÇ SAYIM TEKNİĞİ**

fibonacci katsayıları = 0.618 1.00 1.618 2.618 4.24

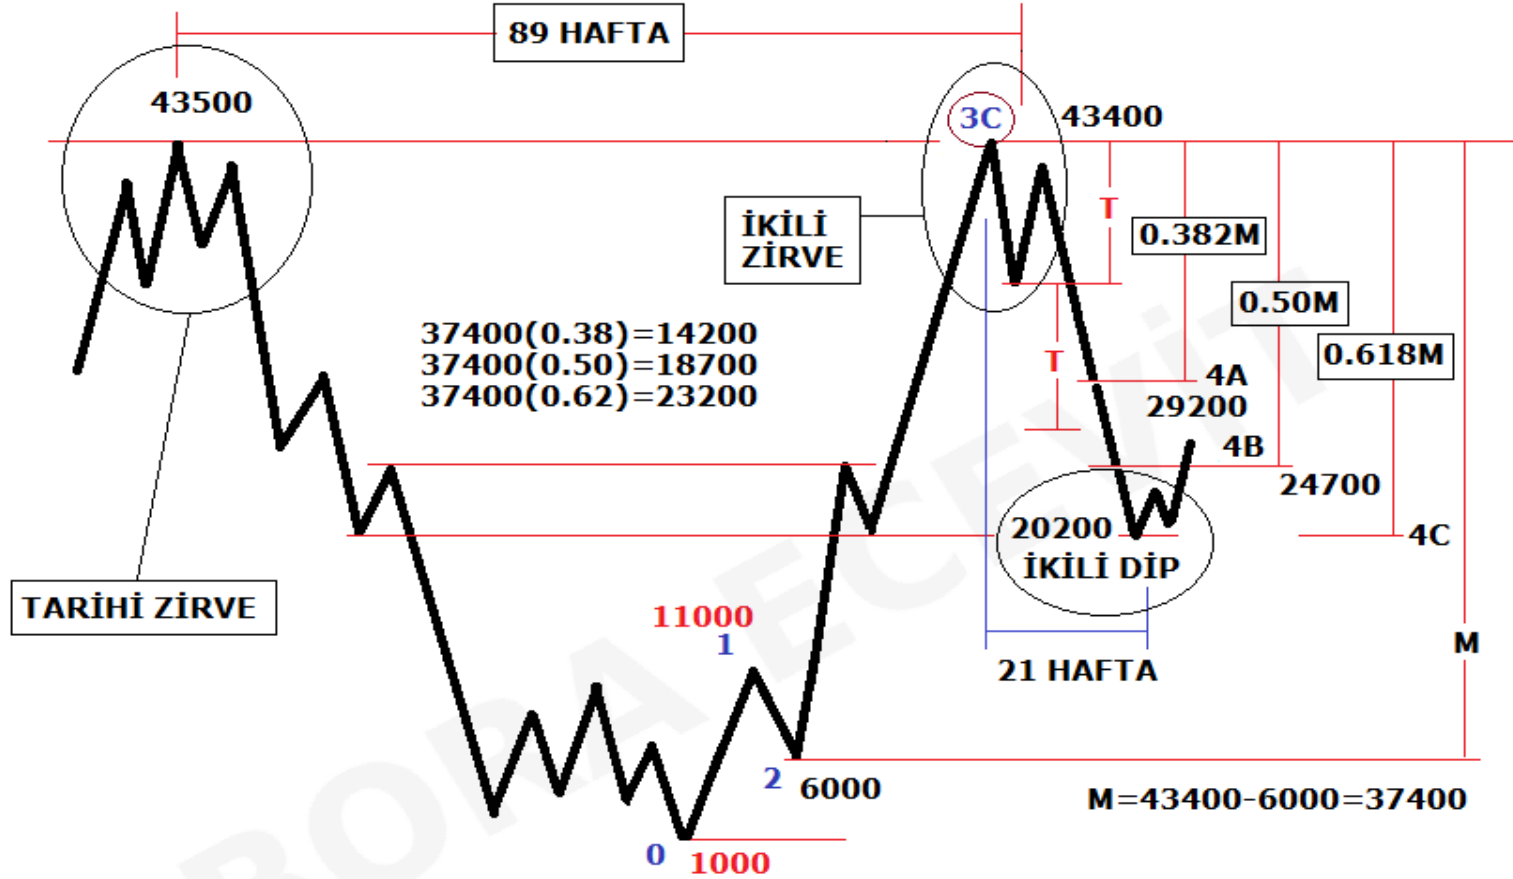

$$3A = 6200 + (10000) = 16200$$

$$3B = 6200 + (10000 + 6200) = 22400$$

$$3C = 6200 + (26200) = 32400$$

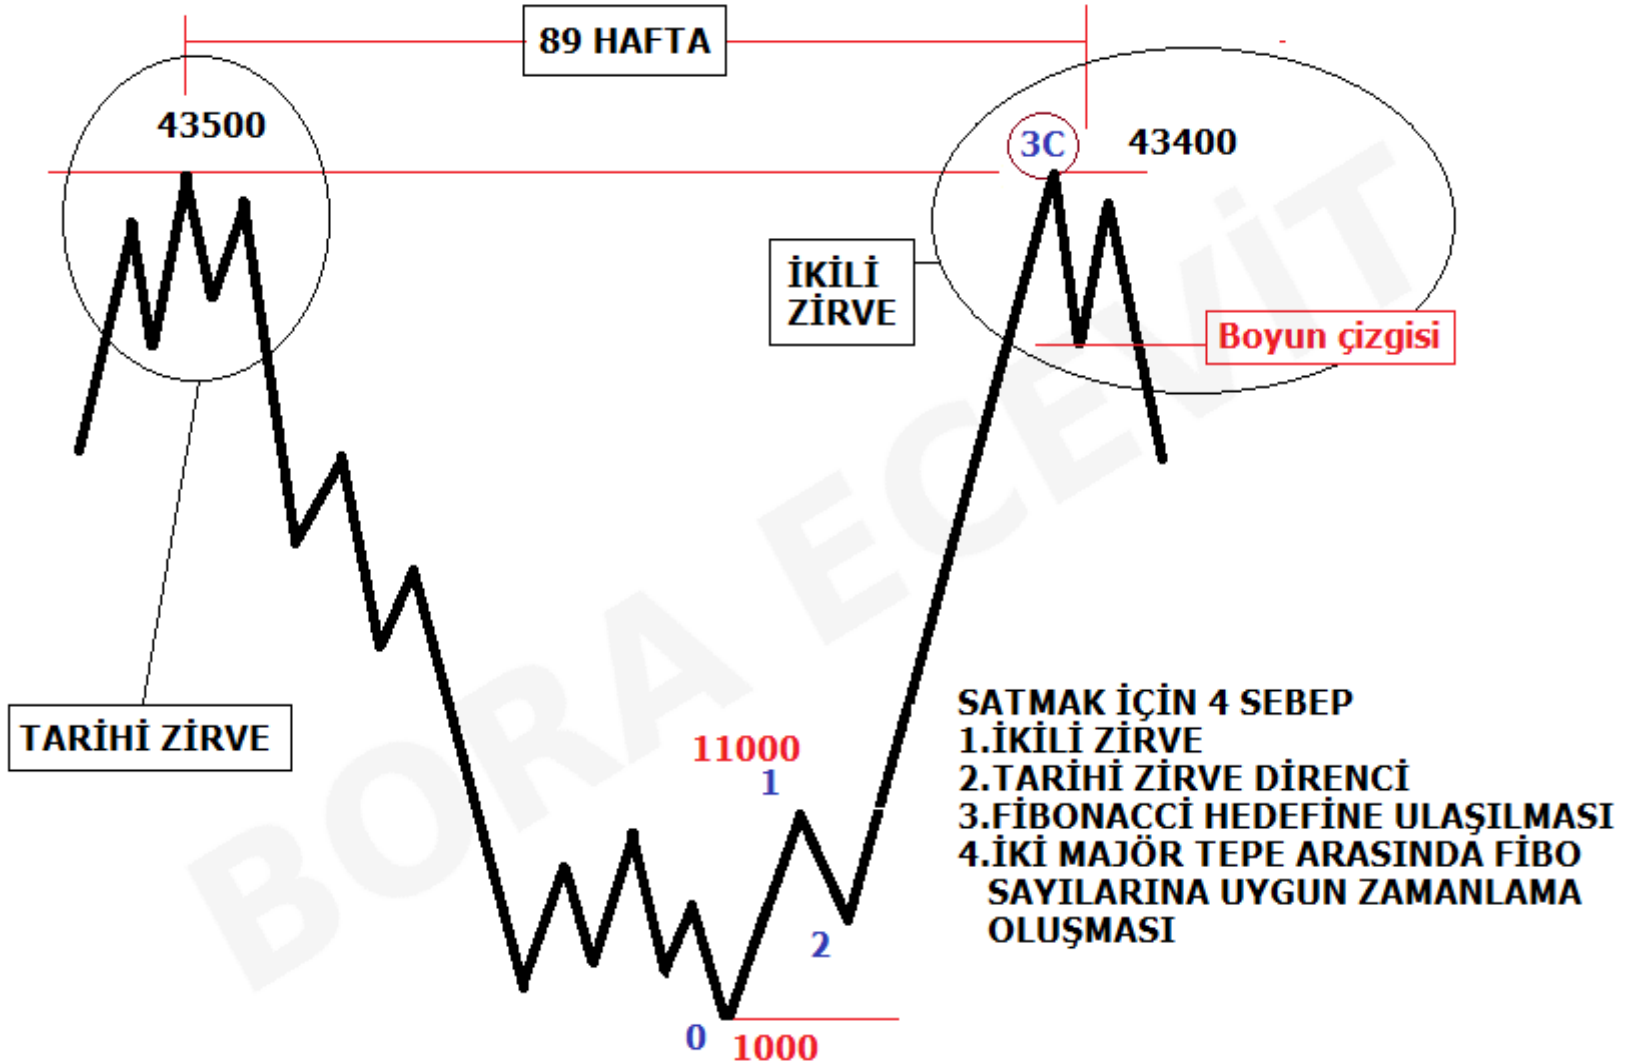

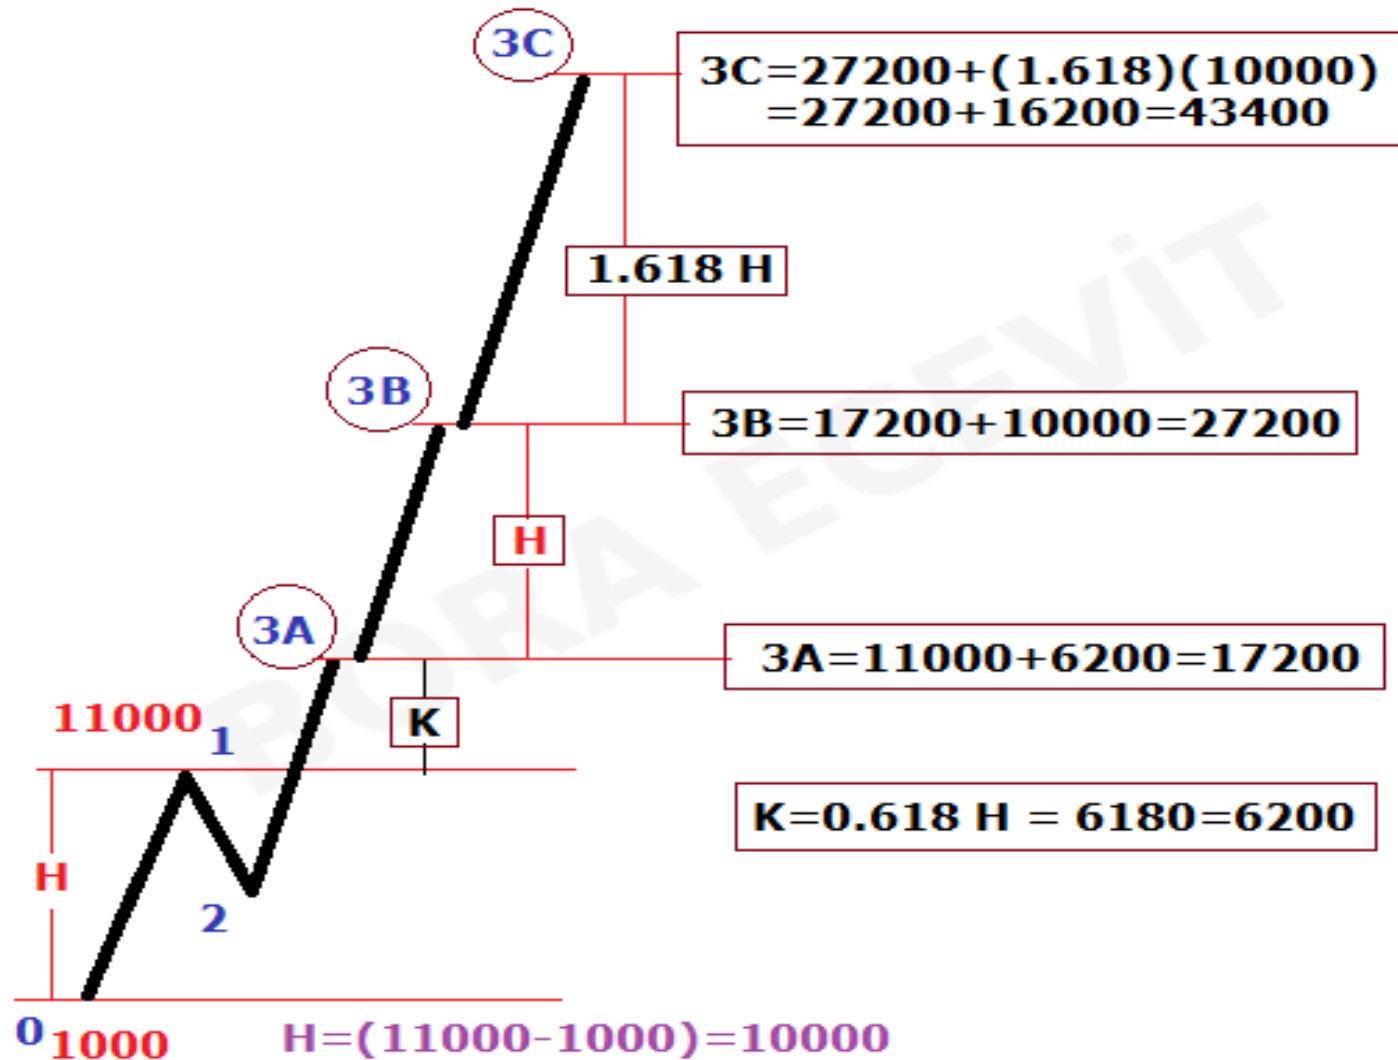

"4" nolu düşüş dalgasının ulaşacağı fiyat seviyesi "1" nolu çıkış dalgasının eriştiği fiyatın altına inemez..

**ALİŞ YAPMAK İÇİN SEBEPLER:**

1. İKİLİ DİP OLUŞUNU
2. FİYAT ESKİ DESTEKLERDEN BİRİ İLE AYNI SEVİYEDE
3. DÜŞÜŞ ZİRVEDEN %62 ORANINDA GERİ GELEREK DÜZELTME YAPTI.
4. ZAMAN OLARAK FİBONACCİ SAYISI OLAN 21 HAFTA İÇİNDE DİP YAPILDI.

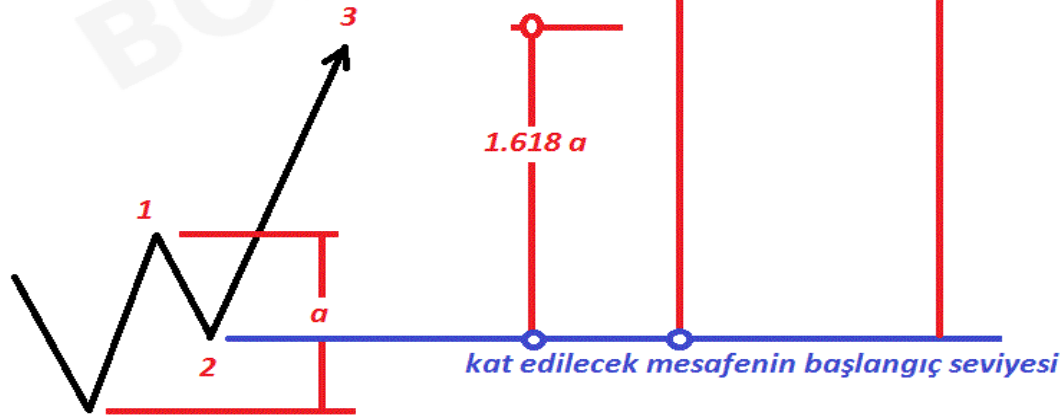

fibonacci katsayıları = 0.618 1.00 1.618 2.618 4.24

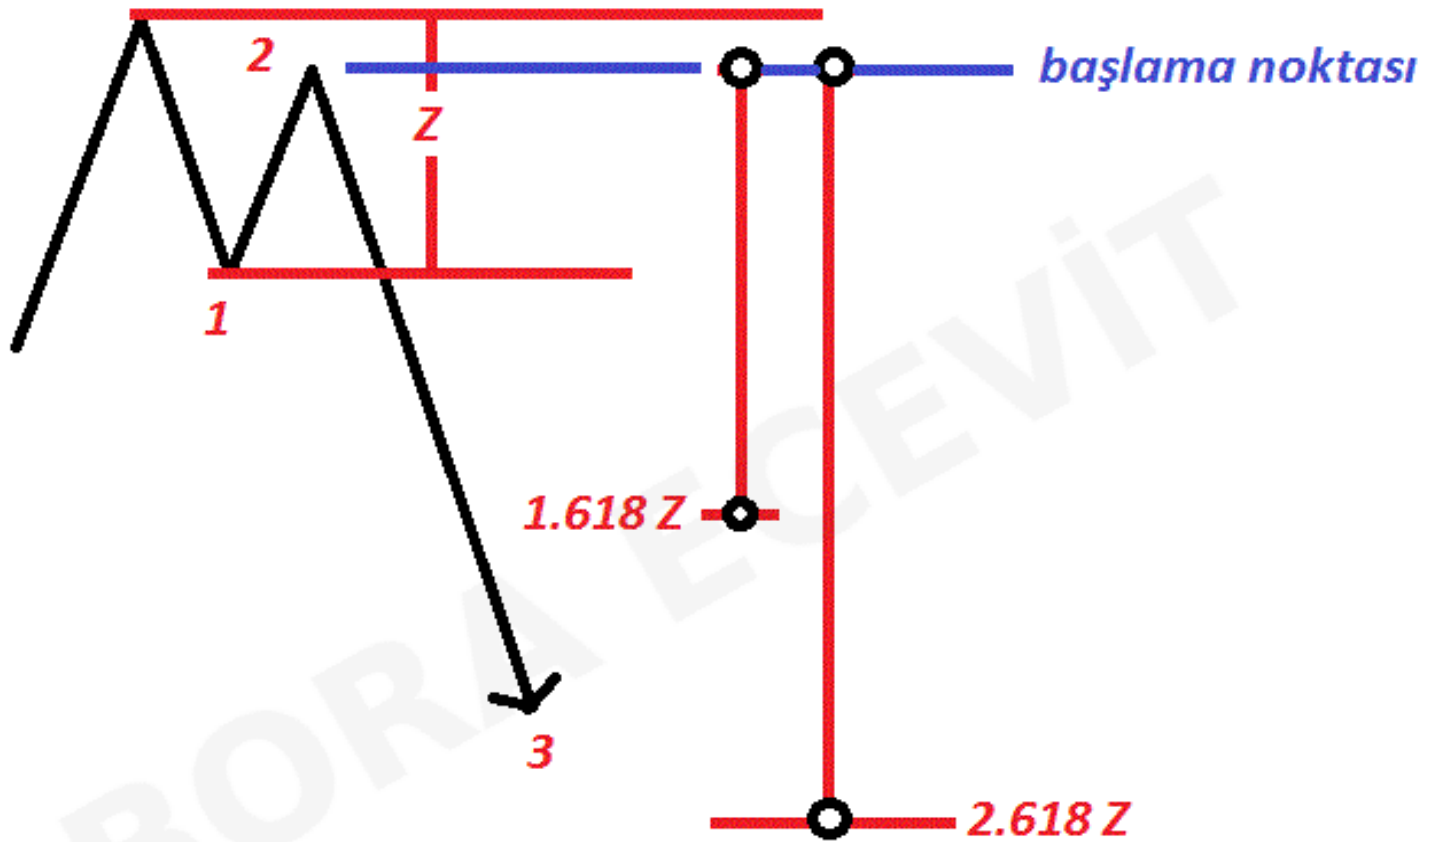

\*\*\* İÇ SAYIM TEKNİĞİ \*\*\*

çok sık görülmese de  
"4.25 a" kadar da  
yukarıya gidilebilir..

3 nolu dalganın yaratacağı  
yukarı harekette muhtemel  
hedeflerin bulunması....

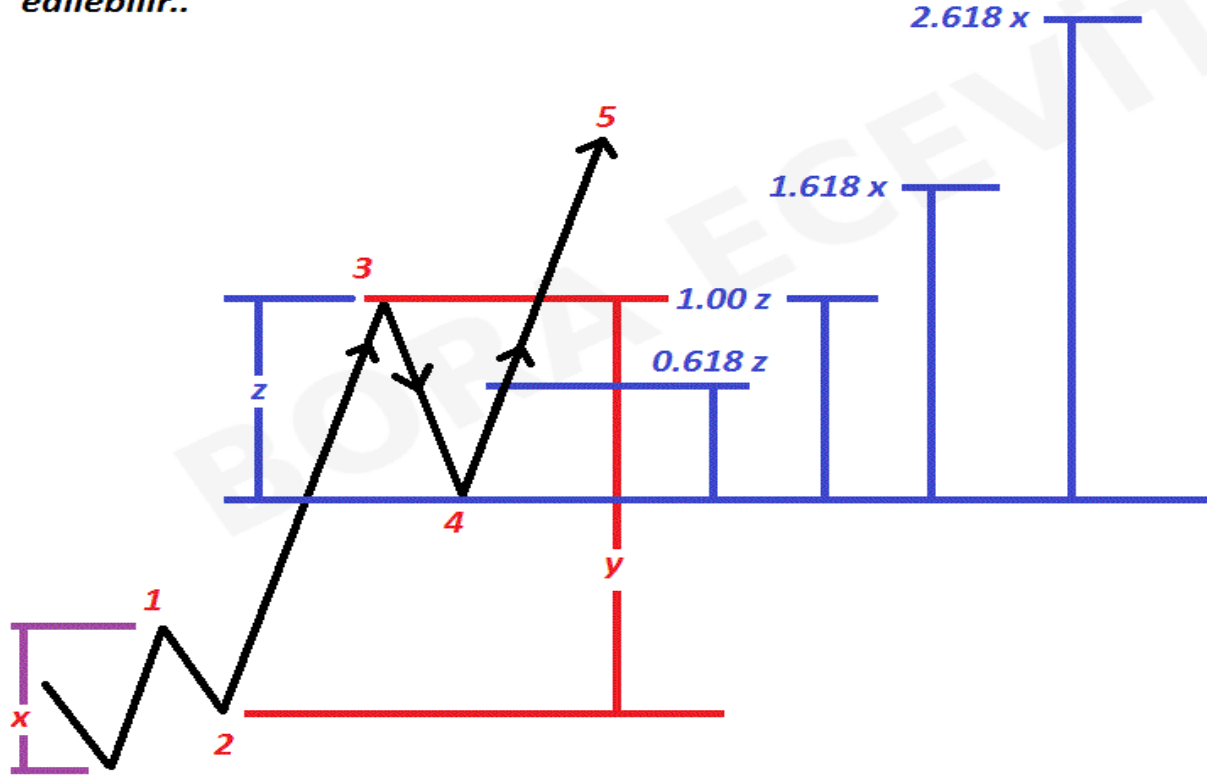

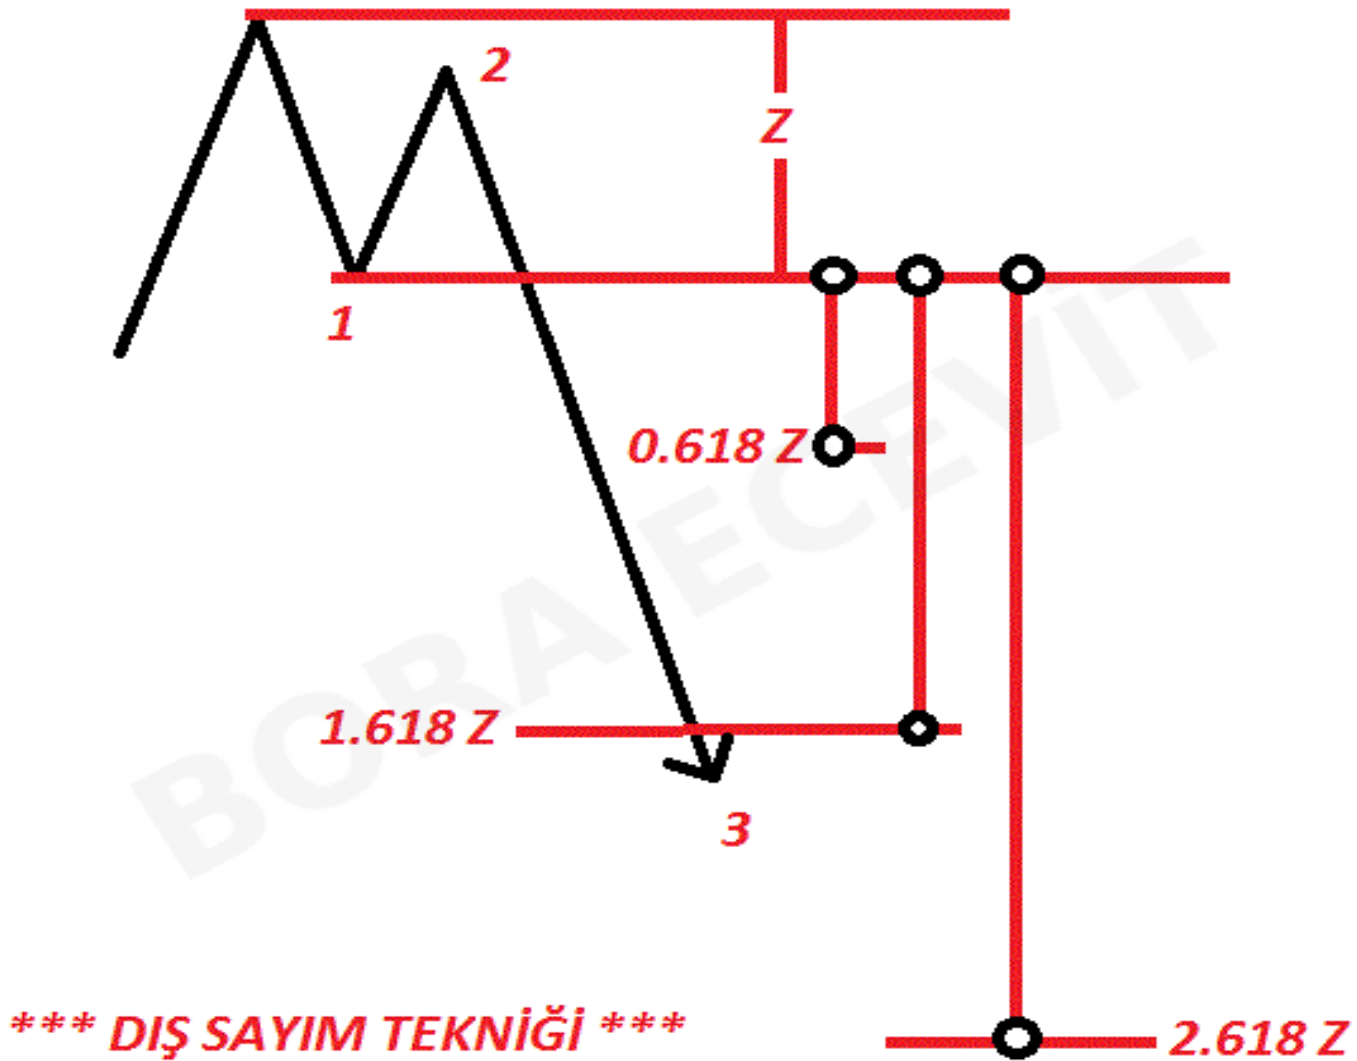

\*\*\* İÇ SAYIM TEKNİĞİ \*\*\*

**\*\*\* İÇ SAYIM TEKNİĞİ \*\*\***

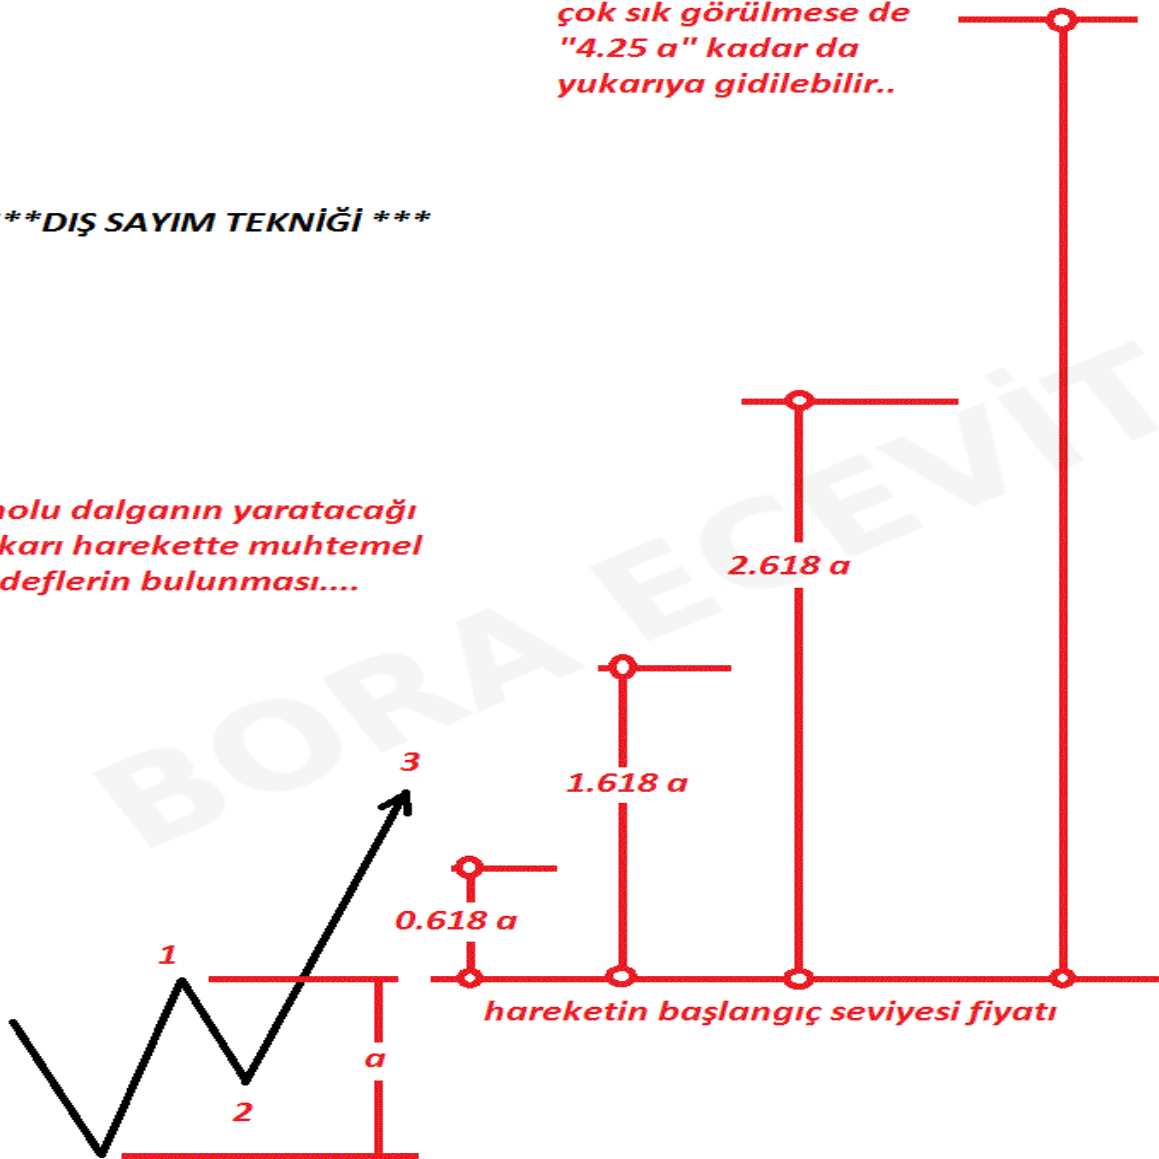

**5 nolu dalga'nın yaratacağı yükselişin hedefi o kadar kolay saptanamayabilir...  
0.618 z ve 1.00 z kadar giden çıkışlar "ikili zirve" görünüşleri yaratacaktır..  
Yeni zirveye gidiliyorsa o zaman ilk dalga yüksekliği Fibonacci katsayıları ile  
çarpılarak "4" nolu dip seviyesine eklenerek 5 nolu dalga'nın hedefi tahmin  
edilebilir..**
